PROFESSIONAL SUMMARY

Entry-Level Java Developer with a strong foundation in Core Java, Spring Boot, Hibernate/JPA, and REST API development. Experienced in designing and delivering full-stack web applications with relational database integration. Completed a 150-day hands-on internship building production-style Java applications. Familiar with Agile development practices, unit testing (JUnit 5), and version control using Git. Passionate about clean code, OOP principles, and continuous improvement.

TECHNICAL SKILLS

Languages: Java 21, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Security, Hibernate, Spring Data JPA, Maven

APIs & Architecture: REST API Design, JWT Authentication, Microservices, API Integration

Databases: MySQL, SQL (Joins, Indexing, Query Optimization), JDBC

Testing & DevOps: JUnit 5, Mockito, Postman, Git & GitHub

Tools & IDEs: IntelliJ IDEA, Postman, Maven, Git

Concepts: OOP, Data Structures & Algorithms, Multithreading, Exception Handling, Agile/Scrum

PROFESSIONAL EXPERIENCE

Java Developer Intern

Jan 2023 – Jun 2023

Q Spiders Training Institute • Chennai, India

- Completed a 150-day full-time internship focused on Core Java, Spring Boot, SQL, JDBC, and software engineering fundamentals through structured training and mini-project development.
- Developed 3+ database-integrated Java applications applying OOP principles, Collections Framework, Exception Handling, and Multithreading — reducing bug rates through structured code reviews.
- Designed and delivered a capstone project integrating a Java backend with a relational MySQL database, demonstrating end-to-end CRUD operations and connection pooling.
- Participated in Agile-style sprint cycles — attending stand-ups, planning sessions, and peer code reviews — simulating real-world team software development.
- Wrote unit tests using JUnit 5 for core business logic modules, achieving ~80% code coverage on key components.

PROJECTS

Academia Core – Student Information & Grade Management Platform *Full-Stack Web Application*

Java • Spring Boot • MySQL • HTML • JUnit 5 • Git

- Architected a full-stack CRUD platform managing student records, course enrollments, and grade tracking across 500+ records and multiple departments.
- Implemented role-based access control (RBAC) for Admin, Faculty, and Student roles to restrict access based on user permissions.
- Optimized SQL queries with strategic indexing on high-frequency columns, improving data retrieval throughput by ~35% under load-test scenarios.
- Achieved 75% unit test coverage via JUnit 5, catching 8+ edge-case defects prior to deployment.

Shop Flow – E-Commerce Order & Inventory Management System

Full-Stack Web Application

Java • Spring Boot • MySQL • REST API • JWT • Git

- Built a secure backend e-commerce platform supporting authentication, product catalog management, cart operations, and order processing for 200+ SKUs.
- Designed RESTful APIs with JWT-based authentication and RBAC, protecting admin and user endpoints against unauthorized access.
- Optimized JPA/Hibernate entity relationships and lazy-loading strategies, reducing average API response latency by ~30%.
- Delivered features iteratively using Agile sprint methodology with user stories and continuous feedback integration.

Spring Security JWT OTP Authentication System

Java • Spring Boot • Spring Security • JWT • OTP • MySQL • REST API

- Built a secure authentication backend using Spring Security and JWT for login and protected API access.
- Implemented OTP-based verification for user registration and account validation. Added password encryption and role-based access control to secure API endpoints.
- Designed REST APIs for registration, login, OTP verification, password reset, and token-based authorization.

Automated Tech Support System

AI-Powered Chatbot & Ticketing Platform

Java • Spring Boot • MySQL • REST API

- Built an AI-powered chatbot to automate responses for common support queries and added ticket escalation for unresolved issues.
- Implemented a ticket escalation engine routing unresolved issues to human agents while preserving full conversation history for audit trails.
- Designed a persistent interaction-log data layer enabling analytics dashboards and continuous improvement of chatbot response accuracy over time.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering

2022 – 2026

Panimalar Engineering College, Chennai, Tamil Nadu, India

GPA: 8.2 / 10.0

Higher Secondary Certificate (Class XII)

2021 – 2022

Sri Arunachala Matric Hr Sec School, Cuddalore, Tamil Nadu, India

79.6%

Secondary School Certificate (Class X)

2020 – 2021

Sri Arunachala Matric Hr Sec School, Cuddalore, Tamil Nadu, India

77.2%

CERTIFICATIONS

- Programming in Java — HackerRank
- Java 4-Week Course — GeeksforGeeks
- SQL Fundamentals — Simplilearn
- Automation Developer Associate Training — UiPath

ACCOMPLISHMENTS & ACTIVITIES

- Awarded recognition at a college-level hackathon for developing an interactive 3D game using Unreal Engine.
- Solved 100+ problems on LeetCode using Java and SQL, strengthening Data Structures, Algorithms, and database problem-solving skills.
- Participated in a Unity Game Development Workshop with exposure to game design and C# scripting.
